

The Library and Information Service will be presenting its fifth Library Research Week this year from 31 July to 4 August. The aim of the event is to let experts in the field explain to emerging Stellenbosch University researchers and students the fundamentals of conceptualizing their research, collecting and analysing their data, and the value of sharing their research.

## PROGRAMME

<b>Monday, 31 Jul</b>	<b>Opening</b>
<b>Tuesday, 1 Aug</b>	<b>Conceptualize your research</b>
<b>Wednesday, 2 Aug</b>	<b>Collecting your research</b>
<b>Thursday, 3 Aug</b>	<b>Analyze research results</b>
<b>Friday 4, Aug</b>	<b>Share and publish</b>

### **Monday, 31 July : Opening**

---

#### **World University rankings and metrics that count**

Research metrics such as output and citation numbers account for a large share of the factors which ultimately determine a university's ranking position. This presentation provides an overview of the methodologies applied by two prominent ranking organisations (Times Higher Education and QS) with specific reference to Scopus as the primary data source. In addition, a brief peek is included of Scopus's complete suite of metrics, including indicators related to societal impact of research.

**Presenter: Lucia Schoombee**

**Date:** Monday 31 July

**Time:** 14:00-16:00

**Venue:** E-classroom, Learning Commons, JS Gericke Library
