

SHORT COURSE: PAVEMENT MANAGEMENT SYSTEMS

DEPARTMENT OF CIVIL ENGINEERING • 17-21 August 2026

COURSE COORDINATOR

Prof KJ Jenkins
SANRAL Chair in Pavement
Engineering
Stellenbosch University

CO-PRESENTER

Dr Elaine Goosen
Stellenbosch University

Mr Gerhard van Zyl
My Cube Asset Management
Systems

FEES

5-day course
R12,500.00

ECSA CPD POINTS

5 points

LANGUAGE

Presented in English

PROGRAMME

Detailed timetable will be sent
to registered delegates

GOALS OF THE COURSE

This course focuses on pavement management of surfaced and gravel roads. South Africa has some 150 000 kms of surfaced roads and 600 000 kms of unsurfaced roads. It is therefore imperative that sound management principles are applied to this network, differentiating between the respective authorities' appropriate requirements.

The PMS course will be done face-to-face and is aimed at engineers, technologists and senior technicians who are: - considering implementing a pavement management system in their network or becoming involved in a PMS; - involved in a PMS and wish to upgrade their knowledge. Comprehensive notes will be provided.

OBJECTIVES

The course focusses:

1. Road Asset Management
2. Pavement Performance
3. PMS components and Data Collection
4. Analysis
5. Asset Management plans and work programs
6. PMS Operation & Presentation

LEARNING PROCESS

The delegates will have the opportunity to immerse themselves in the subject, through a series of lectures augmented by virtual workshops and tutorials.

**PLEASE NOTE: ONLY DIGITAL CERTIFICATES WILL BE ISSUED,
PLEASE CHOOSE THIS OPTION WHEN REGISTERING**

COURSE ARRANGEMENTS

This course will be presented
Face-to-face on the Stellenbosch
Campus. Details will be forwarded
to registered delegates once
payment has been received.
