# Division of Health Systems and Public Health

# Who we are

## Our Vision

To lead in the transformation of health systems and public health in South Africa and beyond through innovative research, education and community-driven solutions that promote equitable, accessible, and sustainable health for all.

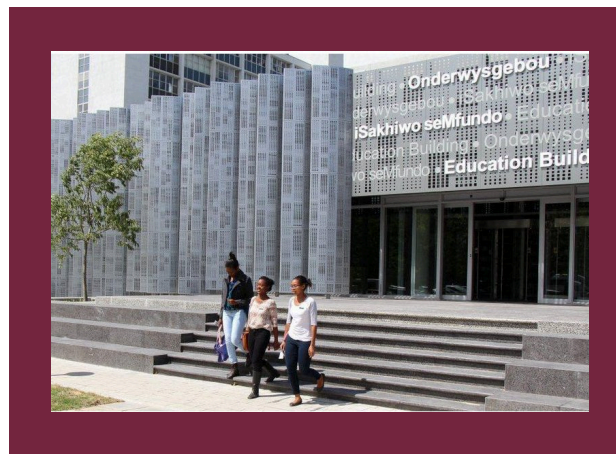

## Our Mission

To improve the health and well-being of communities by conducting transformative research, educating future leaders in health systems and public health, and influencing policy and practice through collaborative partnerships and innovative solutions that promote health equity, accessibility, and sustainability across diverse populations.

"Strengthening Health Systems. Advancing Public Health."

## The Division of Health Systems and Public Health

We combine academic rigor with service-oriented partnerships to improve health outcomes and equity across South Africa and beyond.
