

Message to department head.

I would like to present an opportunity for Mechatronic Engineering interns at our factory.

We are primarily contract mass producers of LED luminaires (currently producing approximately 500,000 units per year), including all the backend electronics required to operate these specialised systems. All our products are designed, developed, tested, and manufactured in-house.

We are looking for interns to assist with the design, development, and implementation of machinery used to manufacture components, as well as the systematic automation of our factory processes.

Our factory is located approximately 20 minutes south of Malmesbury, so candidates should take location into consideration before applying.

My contact details are:

Eckehard Sixt
