

Who we are.

Creating the way forward with innovative transport solutions.

At ITS, we are dedicated to creating the way forward with innovative transport solutions. Our expertise spans civil engineering, specialist transport engineering, electrical / electronic engineering, transport economics, data science, and road safety education. We pride ourselves on being engineers who deliver innovative solutions.

Who we need.

Electrical Engineer

We are looking for a talented Electrical Engineer to join our Electrical team. This position requires a graduate engineer with a B.Eng. or B.Tech. qualification.

Experience of 2 years working in the field of electrical or electronic engineering is preferred but not mandatory. Having your own transportation and a willingness to carry out night inspections is a requirement.

The work is project driven and you will be expected to work as part of a multi-disciplinary team primarily in the fields of Intelligent Transportation and lighting systems.

Get in Touch.

Interested candidates can submit their applications to johanice@itsglobal.co.za. Please include a detailed CV, contact numbers, references, and required certificates. Shortlisted candidates will be contacted for interviews.
