Grounding students in **sustainability** and **entrepreneurship** for **impact investment** and **ethical innovation**

SKILLS FOR A GREEN ECONOMY

Whether you want to launch your own enterprise, make a meaningful impact as an employee, or provide sustainability consultancy services to businesses, this programme is for you.

ADMISSION REQUIREMENTS

You need a Diploma (NQF level 6) or Bachelor's degree (NQF level 7) from a recognised tertiary institution in subjects/fields aligned with the focus of the Advanced Diploma, e.g. sustainable development, entrepreneurship, business studies, economics, innovation.

INTEGRATED MODULES

Sustainability in the Digital Age: explore the sustainable potential of digital technology, impact investment, and responsible leadership.

Research Approaches: focus on transformative and collaborative research, enabling you to identify social issues, collect data, and test the impact of your solutions.

Business Plans and Strategies: learn how businesses can be catalysts for social change, exploring for-profit enterprises, social enterprises, and responsible investment.

Social Entrepreneurship: explore how to develop your own consultancy service as a change agent.

Entrepreneurship Incubator: design innovative projects by applying sustainable technology and critical thinking to real-world challenges.

HYBRID LEARNING

Discover a flexible and dynamic learning experience with our hybrid programme. Benefit from self-directed learning, complemented by daily synchronous sessions and three immersive in-person contact sessions throughout the year. This unique blend ensures you have the flexibility to shape your learning journey while growing a valuable professional network through real-world experiences.

Embrace the opportunity to reimagine our world through sustainable development.
